

Be sure to wash and dry and press all fabrics before cutting - this is an item that gets washed often, so you don't want fabrics shrinking at different rates

Materials (*per napkin*):

2- 5.5" squares of printed fabric for accent. *Note: you can fussy cut these if you like, just be aware that you will eventually trim one half of the square down to a triangle.*

2- 17" squares of fabric for napkin body. *Note: you will get 1 square from a fat quarter, or 2 squares from a full width 1/2" yd of fabric. To make 4 napkins, you will need 2yds of fabric.*

Other items: pins, scissors or rotary cutter, ruler, fabric marker (optional), iron.

All seams allowances are 1/4"

***PLEASE NOTE: NAPKINS SHOWN IN PHOTO WILL SHOW SEWING DETAILS THAT ARE DIFFERENT THAN THIS PATTERN EXPLAINS.**

1. Place an 5.5" square in tthe top LEFT corner, lining up the edges, on the body of the napkin, right sides together. *keep in mind that if your fabric is directional, you will want to face it downward. Sew diagonally from one corner to the other as shown. Trim excess away, leaving 1/4" seam allowance. Open and press seams toward printed side. Repeat this process with the other facing except start with placing the 5.5" square on the RIGHT corner.

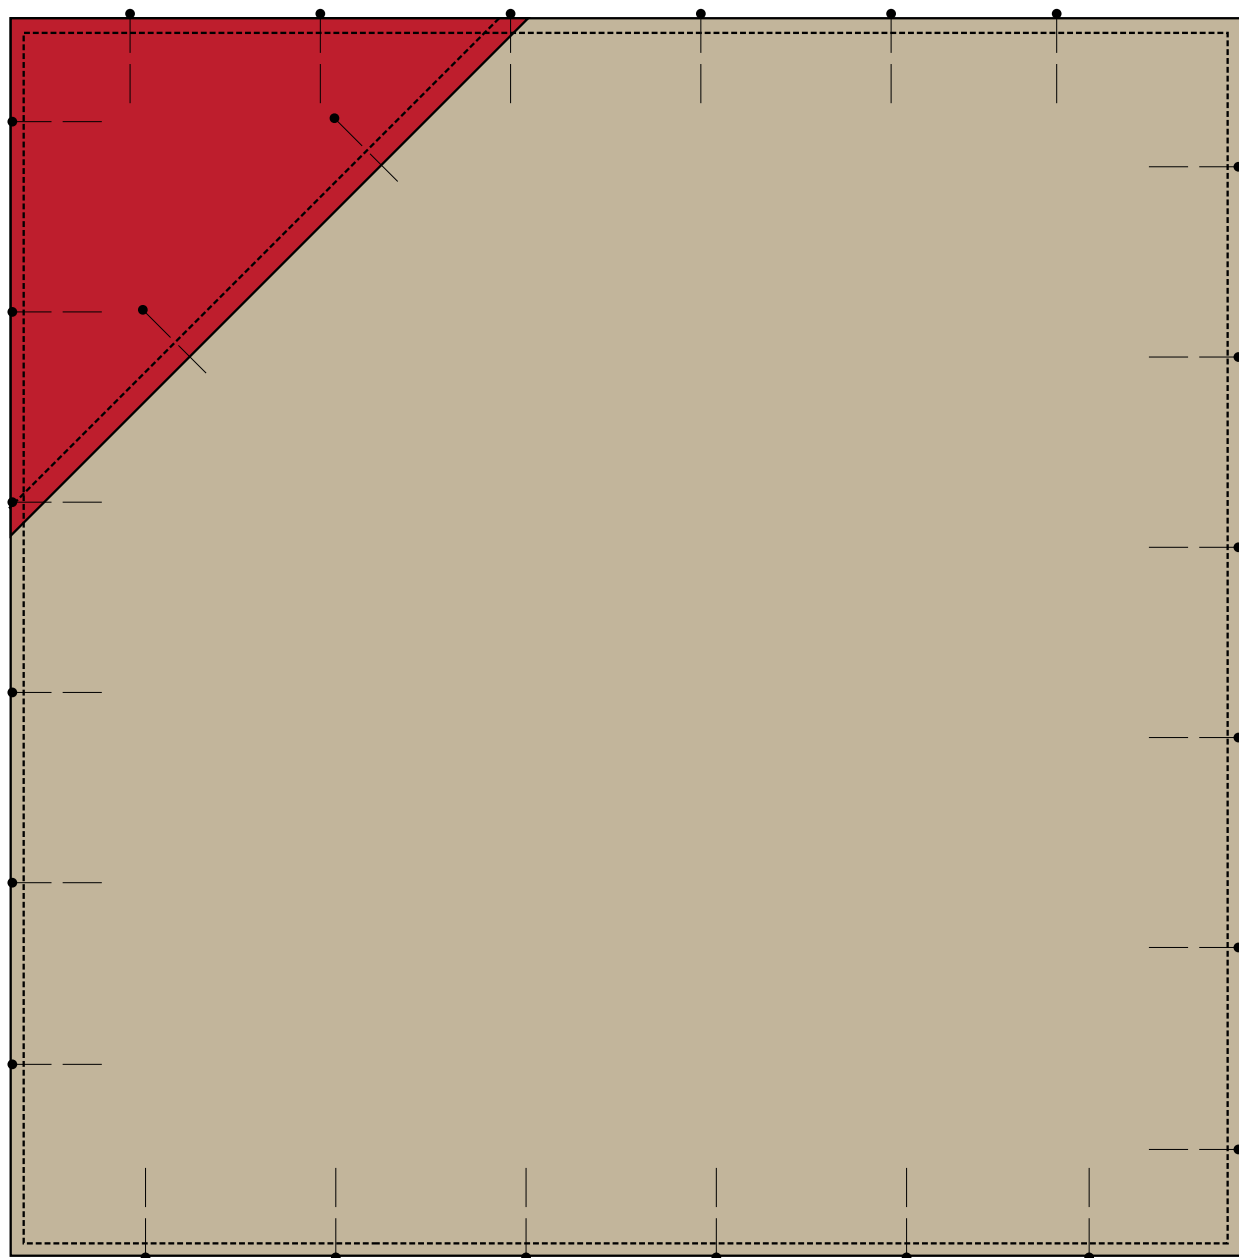

2. With right sides together, match printed corners. Pin. Using a 1/4" seam allowance, stitch around the circumference leaving a 2" opening at the bottom edge of napkin. Trim the corners.

3. Turn the napkin rightside out through the gap at the bottom of the napkin. Carefully poke out the corners to create nice points. Press. Pin along the edges and the corner seam to keep things from slipping. Topstitch 1/8" from edge all the way around which will seal up the gap opening.

Topstitch 1/8" on the printed side of the diagonal seam.

← tuck and press the opening
to create nice smooth edge
